User Experience (UX)

Health/Wellness UX

# Chemotherapy Management Platform

## Website & Mobile web

[NCG - Koita Centre for Digital Oncology.](#)

The collaboration between the National Cancer Grid – Koita Centre for Digital Oncology (NCG-KCDO) and ZEUX Innovation aimed to improve the usability and adoption of digital tools in oncology. Through in-depth field research across cancer centers, the team identified key pain points in treatment planning, chemotherapy management, and patient tracking. ZEUX developed two frameworks, SHIFT for auditing existing systems and HEALING for designing intuitive oncology platforms, creating a human-centered blueprint that empowers clinicians and enhances digital adoption in cancer care.

# iF DESIGN AWARD 2026

## Global seal of excellent design

**The winners of the iF DESIGN AWARD 2026 have been selected!**

To be awarded is a recognition from an independent jury of **129 international leading design and sustainability experts** who evaluate every project through a rigorous, transparent process. With over **10,000 submissions from 68 countries**, the iF DESIGN AWARD is one of the world's most coveted competitions for creative excellence. Since 1954, the iF label has marked the work of designers who dare to **challenge conventions, rethink systems**, and elevate everyday experiences into **meaningful impact**.
